

This is your record as it's spoken, taken down by a stenographic reporter. There's five more screen shots to capture the small section of the digital reporters' record shown above.

The screenshot shows a stenographic software interface with a transcript of a conversation. The transcript is displayed in a central window with a black border. The text is as follows:

1 A. Uh-huh.
2 Q. So at any point in time, if you don't understand the question I'm asking, please ask me to restate it. If you need to take a break, please let me know. I'm not here to play gotcha or anything else. What I'm here to do is try to understand -- because I don't -- the types of services and how the program works --
3
4
07:32:44 5 A. Uh-huh.
6 Q. -- you know, in relation to [REDACTED] and [REDACTED] child, and what would be best for the child and how it fits together.
7 A. Okay.
8 Q. So I would welcome, just so you know, if I ask something incorrectly and you want to correct me, please do. If I'm kind of hitting near something, but I'm not quite on target, if you want to kind of guide

The interface includes a menu bar at the top with options like File, Edit, View, Global, Format, Tools, Open, System, and Window. A toolbar below the menu contains various icons for editing and navigation. On the right side, there is a 'Global View' panel with a list of items, some of which are highlighted in green. The bottom of the window shows a status bar with the time '07:32:44'.
